Science Fair Event Details  
NOTE NEW LOCATION

Saturday March 23

Due to Culp Center Renovation, The Fair is being held on the arena floor (south end) of the Mini-Dome on the ETSU campus. SEE MAP BELOW

- **Projects** are to be set up by 9:30 A.M., earlier if possible. Early set up would be appreciated because the safety committee will review each project before it is judged. The MiniDome will be open for project set up as early as 7:55 AM.

- **Judging** will take place from ~10:00am – 12:30pm (Students are to be with their projects during this time).

- **Cars** may park in the Parking Garage due West of the MiniDome. No passes are needed for the weekend. The garage has sufficient space to accommodate all fair persons this year.

- Cars and Bus **unloading** can be done on the West side of the minidome. SEE THE NEW MAP on the Fair Webpages for Unloading Areas. Buses should go to Lot 22 (west end of campus) to park after unloading.

- **PLEASE chaperone your students while they are in the MiniDome.** Remind them to walk not run through the building.

  A note about Restrooms! Very limited restrooms are available at floor level on the East side of the arena floor (signs direct you into hallways). Plan Ahead as preferred Restrooms are located on the Main Concourse 2 levels above the arena floor. SIGNS WILL BE POSTED!

There will be seating for parents, teachers, chaperones on the arena floor but the stands will also all be open and available for seating (NOTE restroom access is more easily available from the stands).

The awards program will begin at ~2:15-2:30 pm and will take place adjacent to the Table area on the MiniDome arena floor. Our goal is to complete the awards program by 3:30 pm. All project displays are to be taken down immediately following the awards program and removed no later than 5:00 pm.

YOU MAY WISH TO VISIT the George L. Carter RAILROAD MUSEUM during the break before the Awards Ceremony. It is located at 113 Campus Center Building, look for the full size RailRoad Crossing Sign replica outside the building.
