Title of project \_\_\_\_\_

**Student's statement:** Briefly describe your project, with special attention to how **vertebrate subjects** will be used. Tell where you will get the animals; and describe how you will minimize risk of injury and discomfort while they are subjects of your research.

**Student's signature** \_\_\_\_\_ **Date** \_\_\_\_\_

**Teacher's statement:** I carefully reviewed this research project with my student before the research was conducted, and was satisfied that the student understood proper and humane care of **vertebrate subjects** and would provide proper care during the research.

**Teacher's signature** \_\_\_\_\_ **Date** \_\_\_\_\_

**Teacher's name** (printed) \_\_\_\_\_

**Veterinarian's statement:** I discussed the project with this student before the research was conducted, with special attention to potential risk of injury or discomfort to **vertebrate subjects**. I am satisfied that this project -- as described to me -- presents no significant risk for **vertebrate subjects**, or that appropriate precautions have been incorporated into the project to eliminate potential risk.
