Complex Analysis 1, Test 1 Study Guide
Prepared by Dr. Robert Gardner
Fall 2011

1.1 The Real Numbers. Complete ordered field, uniqueness of a complete ordered field.

1.2 The Field of Complex Numbers. Definition of $\mathbb{C}$, “Is $\mathbb{C}$ isomorphic to $\mathbb{R}^2$?” modulus, conjugate.

1.3 The Complex Plane. Geometric relationship between $\mathbb{R}^2$ and $\mathbb{C}$, Triangle Inequality and its sharpness, Cauchy sequences of real numbers, Axiom of Completeness.

Ordering the Complex Numbers. Ordered fields, Law of Trichotomy, Corollaries 1 and 3 ($i$ is not positive, $-i$ is not positive), Theorem 3 ($\mathbb{C}$ is not an ordered field), lexicographic ordering of $\mathbb{C}$ and its uselessness, well ordering, total ordering, Well-Ordering Principle.

1.4 Polar Representations and Roots of Complex Numbers. Argument, cis($\theta$), DeMoivre’s Formula, $n$th roots of unity.

1.5 Lines and Half-Planes in the Complex Plane. Equation for a line, half planes as inequalities.

Ilieff-Sendov Conjecture. Gauss-Lucas Theorem, Corollary 1 (convex polygon containing zeros of a polynomial), Corollary 2 (circle containing zeros), Theorem 2 (centroid of zeros), Ilieff-Sendov Conjecture.

1.6 The Extended Plane and Its Spherical Representation. Extended plane, Riemann sphere, stereographic projection, projections of circles.
3.1 **Power Series.** Absolute convergence, lim inf/lim sup, power series, geometric series, radius of convergence, Ratio Test.

3.2 **Analytic Functions.** Differentiable at a point, Differentiable implies Continuous, analytic, Chain Rule, Proposition III.2.5, $e^z$, $\cos z$, $\sin z$, periodic function, branch of the log, principle branch of log, branch of $z^b$, region, Cauchy Riemann Equations, harmonic function, harmonic conjugate.

**A Primer on Lipschitz Functions.** Derivative of a function between two metric spaces, Lipschitz and locally Lipschitz functions between two metric spaces, examples of functions showing converse statements do not hold, $C^n$ functions, $\text{Lip}^n$ functions.
