Packing the complete bipartite graph with hexagons. (English summary)

36th Southeastern International Conference on Combinatorics, Graph Theory, and Computing.

Congr. Numer. **174** (2005), 97–106.

Summary: “Let $K_{m,n}$ denote the complete bipartite graph on $m + n$ vertices with partite sets of cardinalities m and n . We give necessary and sufficient conditions for the existence of a 6-cycle packing of $K_{m,n}$.”
